Liberty Resources Limited ("Liberty") is rapidly developing its technical team of staff and advisers to focus on the large scale commercialisation of its Underground Coal Gasification ("UCG") Projects.

Liberty welcomes Lance Harcourt, who has joined as Projects Engineer and Dr Ross Waring, who specialises in gas processing, design, modelling and Turbine Engineering. Mr Harcourt has spent 28 years designing, project engineering and managing projects in the Oil and Gas industry in Australia and overseas. His experience with large-scale commercial projects, including BHP Billiton and Woodside, will be an asset to the company moving forwards.

Peter Sallans, Liberty's newly appointed Manager - UCG, previously worked as the Oil and Gas Operations Manager for Mitchell Drilling, a world leader in directional well drilling. The most effective way of retrieving gas from deep coal is via directional wells, whether it be via UCG or coal seam gas.

Dr Dennis Gee has also joined our Geological team, bringing extensive expertise from the CSIRO, Government and Private sectors in exploration management and Geothermal Energy.

"Liberty is focussed on the commercialisation of UCG globally," Liberty's Managing Director, Andrew Haythorpe commented, "The company is growing at an accelerating pace, with the technical capabilities in place we are preparing the company for commercial operation."

Liberty Resources is entering an exciting new chapter in the Clean Energy story.

Yours faithfully

Andrew Haythorpe

Technical Team Profiles

Peter Sallans – Manager UCG

Peter has extensive experience in coal exploration, mine gas drainage, coal bed methane production, and drilling of more than 350 directional wells. He worked with Mitchell Drilling and Mitchell Energy for five years, as Oil and Gas Operations Manager, Executive Manager Commercial & Risk Health, Safety and Environment Manager and Human Resources Manager.

Peter holds a degree in economics. He was previously a Commissioner on the South Australian Occupational Health and Safety Commission and has been a member of a number of international and national technical committees drafting legislation, regulations, codes and standards. He has also been a member of various drilling industry committees developing drilling competency standards, Wellsite permit systems, and underpinning well control training materials.

Lance Harcourt – Projects Engineer

Lance has spent 28 years designing, project engineering and managing in the Offshore Oil and Gas Industry in Australia and overseas. He was a Construction Manager for BHP Billiton; Site Construction Manager/Senior Project Engineer on the A\$200m Cliff Head A Wellhead Platform project at Roc Oil; Project Engineer/Lead Architect at Fluor Amec Joint Venture; Lead Architect on Woodside Energy Limited's Otway Project; Study Manager/Lead Architect at CEIS (Clough); Project Engineer/Lead Architect at Clough Offshore and Project Engineer at McDermott International, Dubai. He was engaged with Woodside Offshore Petroleum as Lead Architect on the decommissioning of North Rankin A & B Living Quarters.

Lance is proficient in all aspects of project administration including planning, coordination, commercial and management and has specific expertise in coordination and preparation of contracts, cost estimates and tenders.

Dr Ross Waring – Process Engineer – Watershed Corporate

Dr Ross Waring has 25 years experience in energy and high-technology engineering. Relevant experience includes serving as a Director of Turbo Genset Co., Heathrow, London; Advisor to the Nicaraguan Energy Institute for the refurbishment of steam power stations; Project Engineer with Dresser Rand, Wythenshaw, Manchester, UK for power train and subsystems for offshore export gas compressor modules; BP Exploration and Shell, North Sea and Graduate Engineer, State Energy Commission, Perth, WA, commissioning of 1600km natural gas pipeline turbine driven compressor stations.

He graduated from the Imperial College, University of London with a PhD, in Mechanical Engineering and an MSc in Advanced Mechanical Engineering. He also completed a Bachelor of Engineering at Curtin University Perth. Ross is a member of the Institute of Directors UK, Institute of Engineers Australia, Australian Institute of Company Directors and the Institute of Mechanical Engineers London UK.

Steve Craig – Mining Engineer - ORElogy

Steve Craig is the Managing Director of ORElogy and is a qualified Mining Engineer with over 21 years of Australian and International experience. Steve's specialty is mine planning and he has worked on many and varied mine scheduling problems throughout the world. Over the past 5 years Steve, together with his business partner Ross Cheyne, has built a consulting group with a significant client base and proven track record in providing innovative solutions to mining orientated challenges. ORElogy is the developer of a new, innovative scheduling system called evORElution.

Dr Dennis Gee - Geologist

Dr Dennis Gee is a geologist with 45 years experience in the mining industry, government service and research management. He served as CEO of the Cooperative Research Centre for Landscape Environments and Mineral Exploration attached to CSIRO; Director of the Northern Territory Geological Survey; Regional Exploration Manager with MIM Exploration, and Reynolds Australia Metals and Deputy Director of the Geological Survey of Western Australia.

He is a graduate of the University of Tasmania with BSc (Hons) and PhD. He is a member of the Australian Institute of Geoscientists, and Member of the Australian Institute of Company Directors, and is the non-executive Chairman of Torrens Energy Ltd.

Noel Archer - Geologist

Noel has 30 years experience in the resources industry, mainly in Western Australia and China. He is Principal Consultant of Longbow Geological Services Pty Ltd and has been a founder, Managing Director, C.E.O., and Executive Director of three junior mineral exploration companies. He has worked in open cut and underground mines and as part of gold operation executive management teams.

His Qualifications include a BSc (Hons), a Dip. Ed. University of New England, Armidale, NSW, M.Sc. (Distinction) University of Leicester, England and a Teaching Certificate - N.S.W. Education Department. He is a current Member of the Australasian Institute of Mining and Metallurgy and a Fellow of the Society of Economic Geologists.

Andrew Spinks – Geologist

Andrew Spinks is a Geologist with over 19 years of experience in the Mineral Resource Industry in senior management and consulting roles from project development and mining environments in Australia and Africa. Andrew's experience includes gold, base metals, diamonds, Industrial minerals an PGE's.

His Qualifications include a BAppSc, a Grad.Dip (Mining) and Unrestricted Quarry Managers certificate. He is a current Member of the Australasian Institute of Mining.

Andrew has most recently been engaged with Redox Diamonds Limited as Chief Operating Officer. Prior to that he was the Manager - Geology with Crescent Gold Limited. Chief Geologist on the Golden Pride Project at Resolute Tanzania Limited in Tanzania, East Africa. Chief Geologist at Black Range Minerals, NSW Australia and Geology Manager for Australian Gold Fields NL Western Australia.
